

VLSI Design (CSE-4411)

INTRODUCTION

Agnik Saha

Department of Computer Science and Engineering

R. P. Shaha University

August 21, 2023

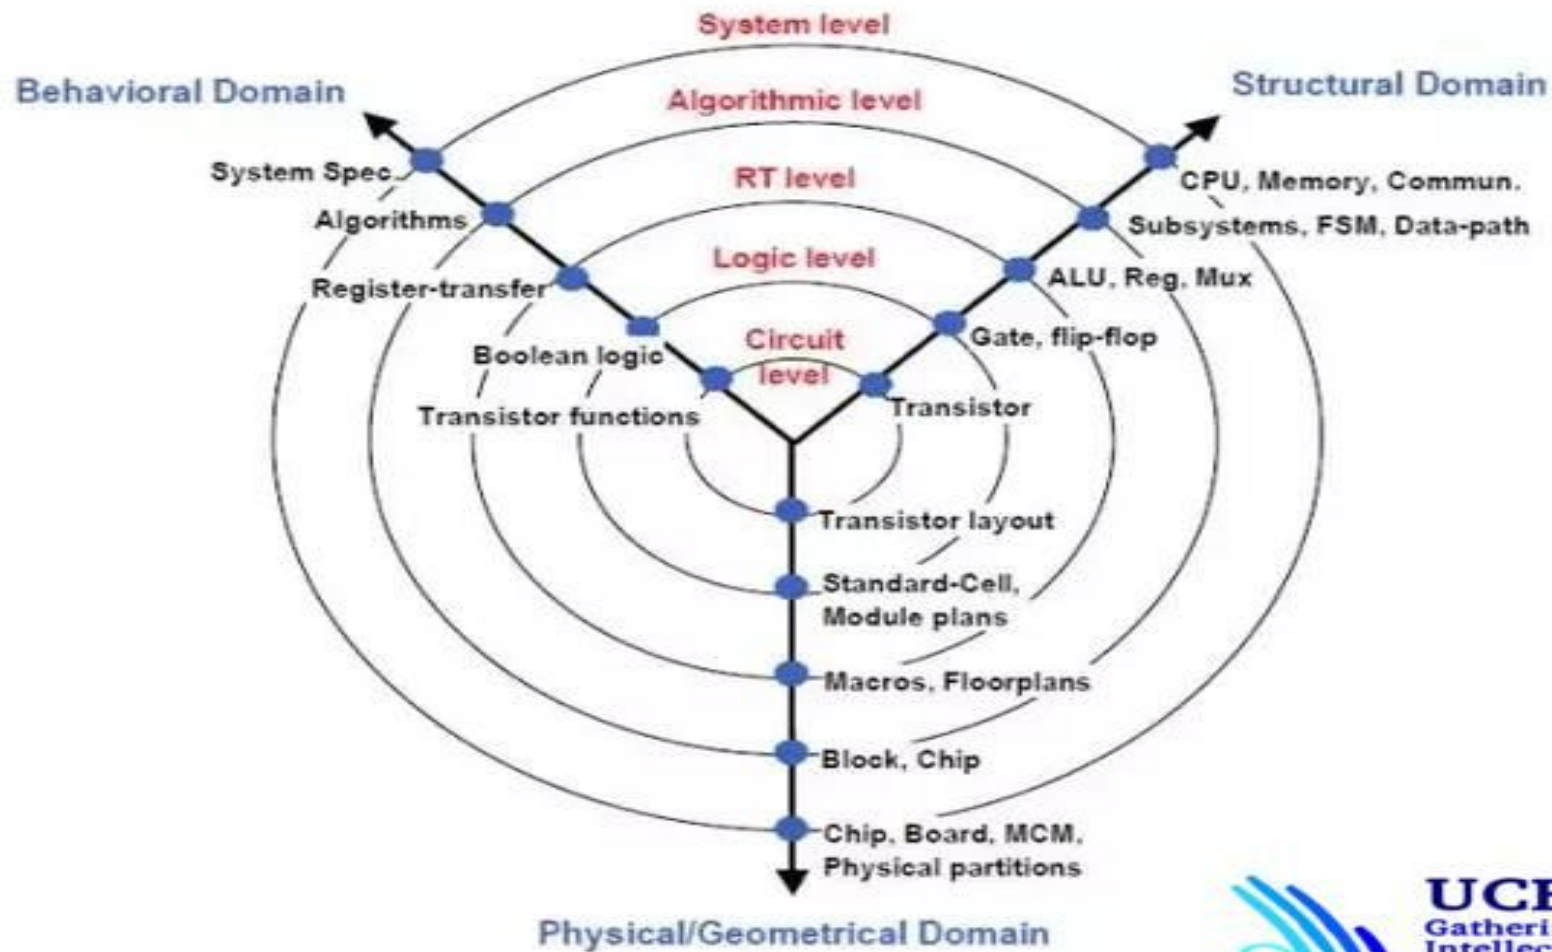

Course Logistics

- **2 Class Tests (15%)**
- **2 Assignments (15%)**
- **Class Participation (5%)**
- **Mid Term (20%)**
- **Final Exam (40%)**

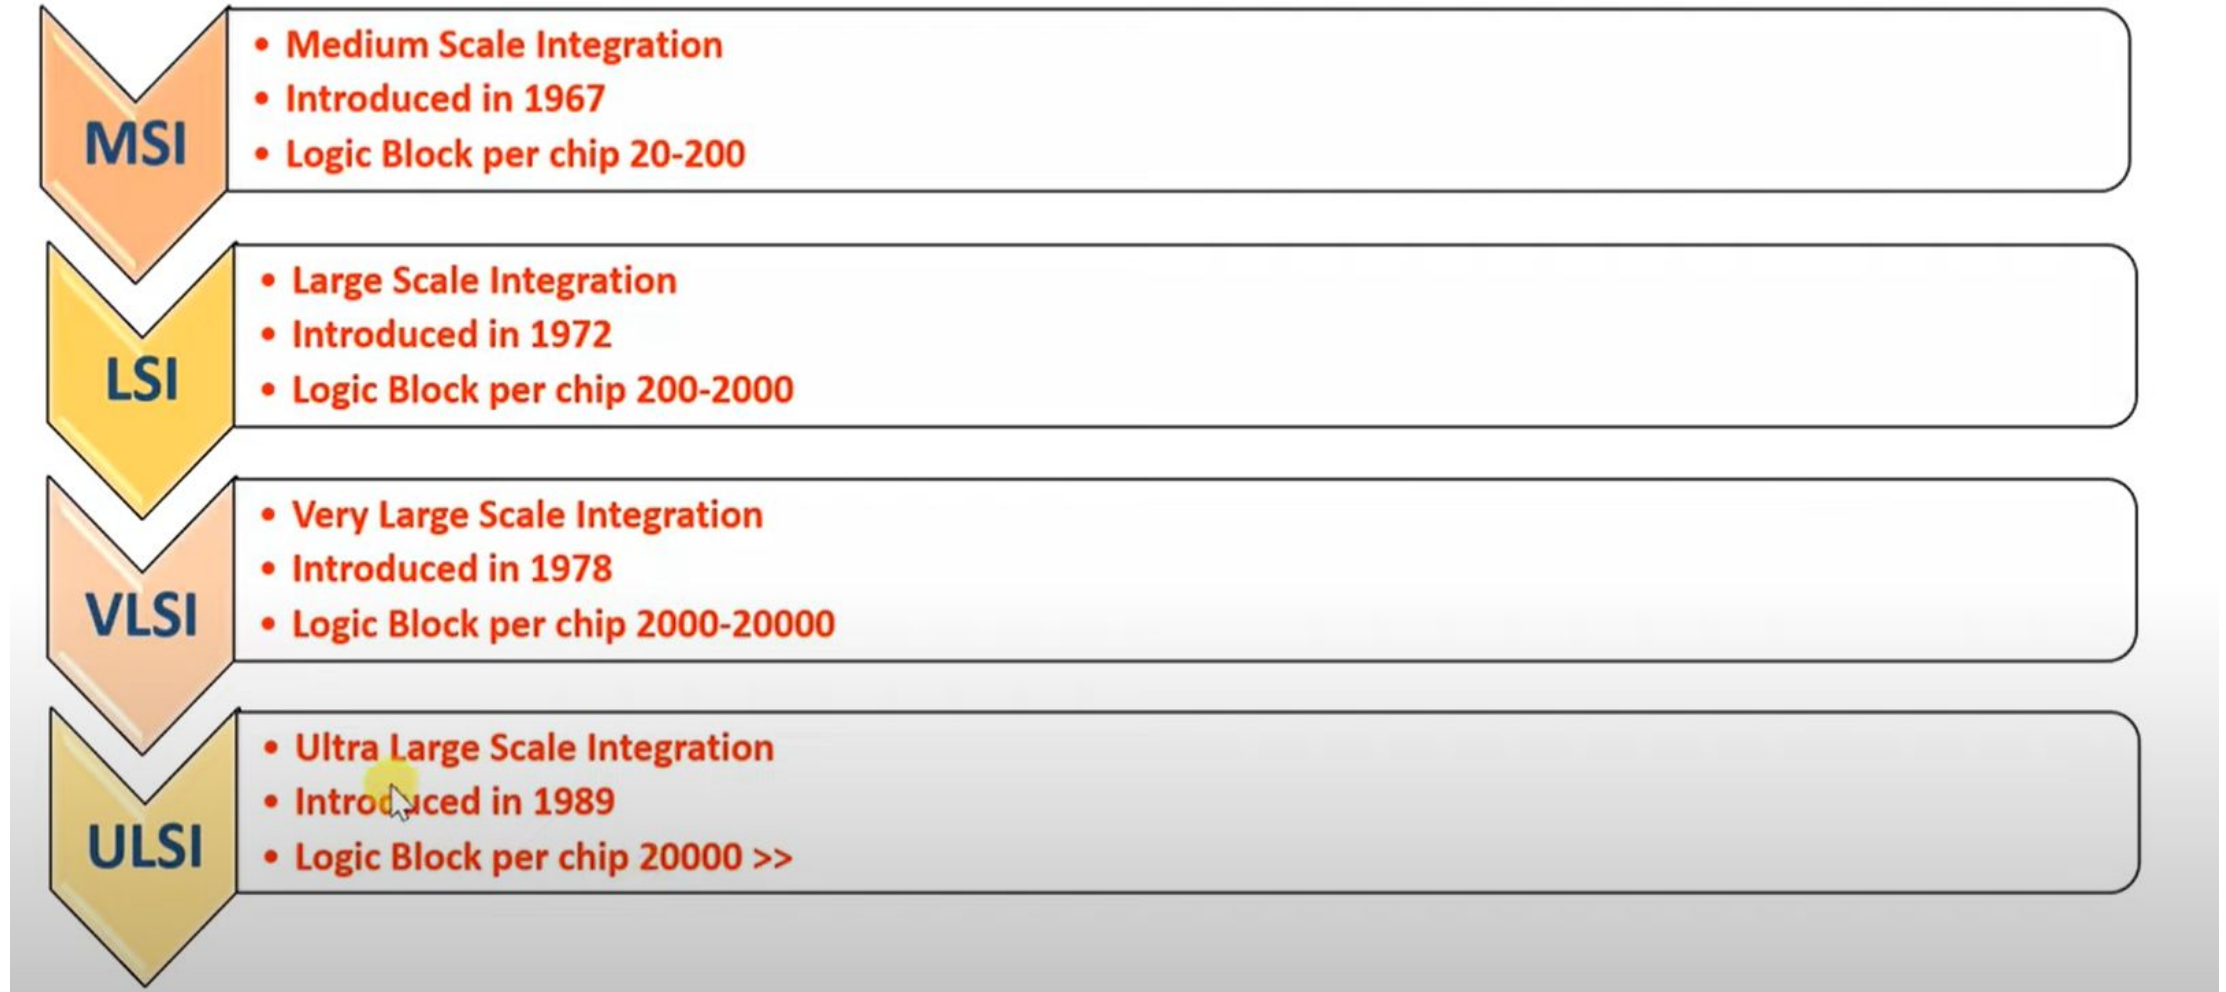

Outline

Outline

Evolution in logic complexity in IC's

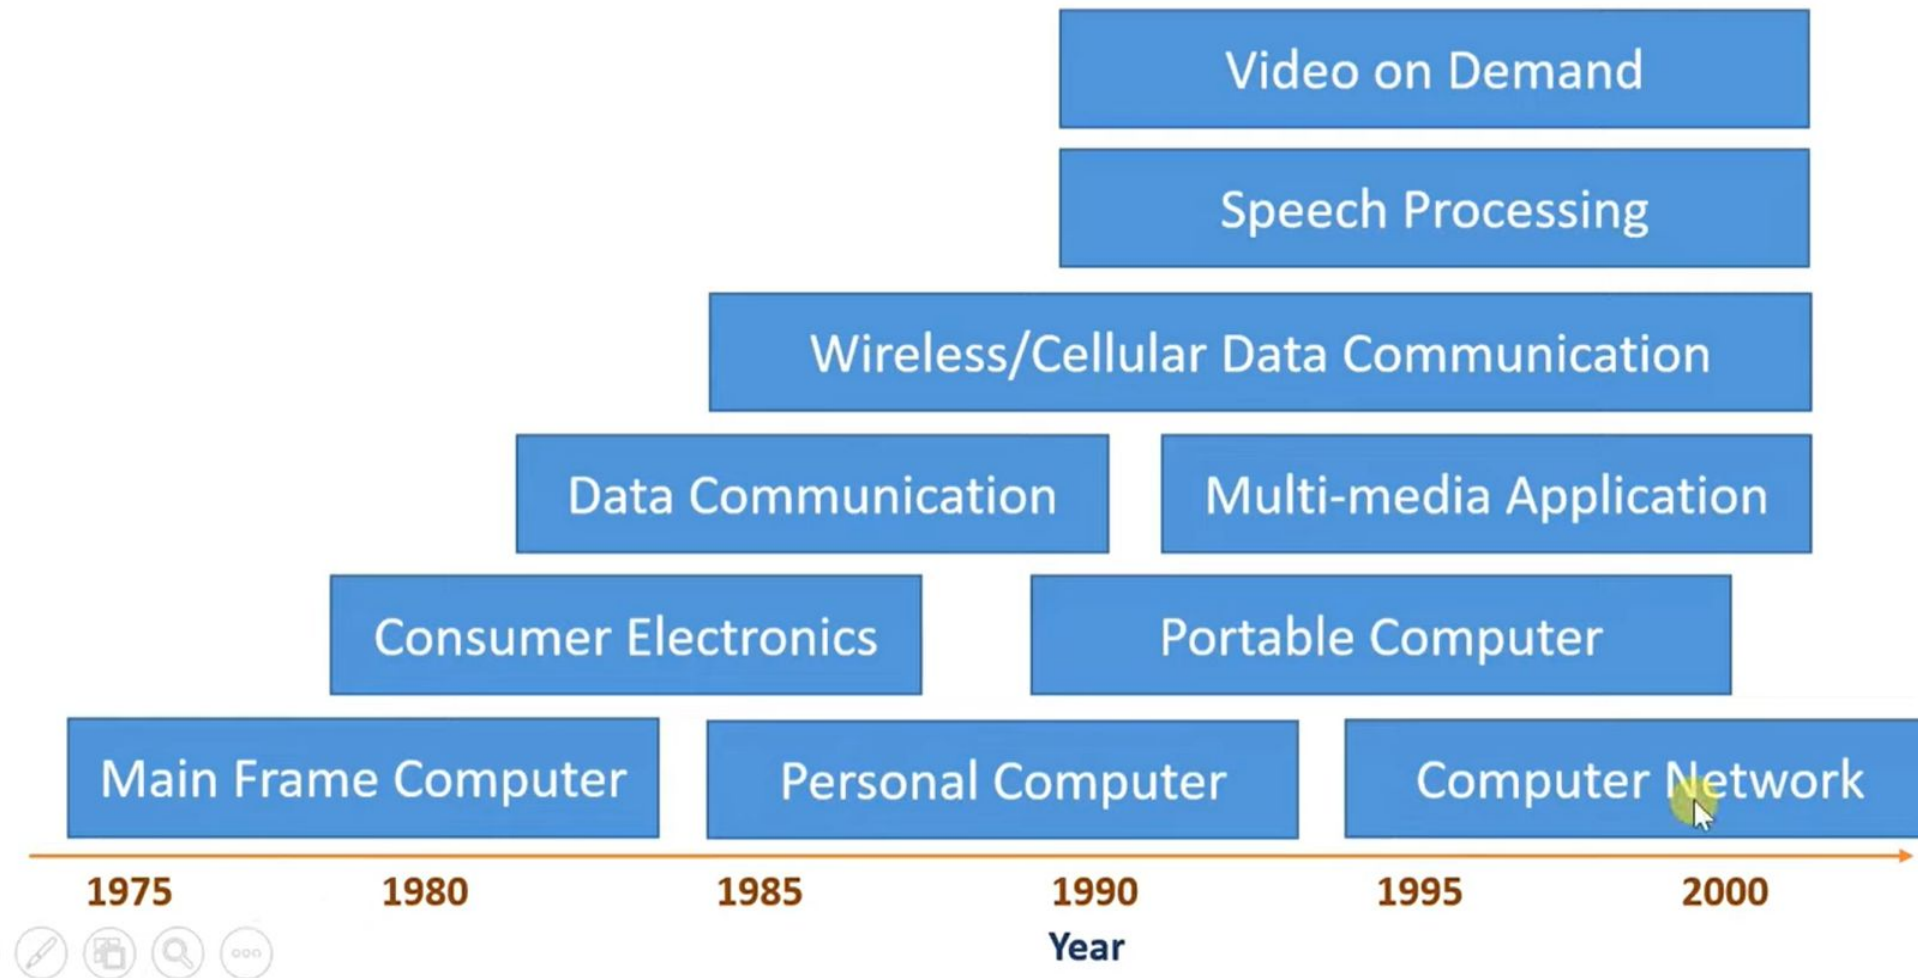

Evolution in logic complexity in IC's

Evolution of Size in Integrated Services

Prominent Information Technology Services

Some Facts

- **1.4 Billion mobile phones & tablets**
 - **About 100 million transistors per phone processor**
 - **About 2 GB per phone/tablet of memory 180 million PCs, laptops, desktops, and servers**
 - **About 1 Billion transistors per processor**
 - **Average memory of 8 GB each**
 - **Total logic transistors ~ 3.2E17**

Mobile Parts Breakdown

Electronic Components
About one dozen major ICs

Mobile Parts Breakdown

Moore's Law

- ❑ **1965: Gordon Moore plotted transistor on each chip**
 - Fit straight line on semilog scale
 - Transistor counts have doubled every 26 months

Integration Levels

SSI: 10 gates

MSI: 1000 gates

LSI: 10,000 gates

VLSI: > 10k gates

Moore's Design Rule Scaling Law

20 Years of Progress

Why integrated circuits are preferred

- **Compact size**
- **Low power consumption**
- **Lesser weight**
- **Reduced cost**
- **Improved operating speeds**
- **Increased reliability**

Ref: [medium](#)

Fabrication

- ❑ **Chips are built in huge factories called fabs**
- ❑ **Contain clean rooms as large as football fields**

Semiconductor industry: A new possibility for Bangladesh

- Walton took the first step by establishing the country's first hardware manufacturing plant, followed by Samsung's assembly plant.
- only 3 semiconductor companies !!!
- worldwide profit from semiconductor sales reached \$481 billion in 2018.
- current market ~ above \$600 billion.
- In 2011, the annual electronics sales were \$216 billion, reaching a staggering \$2.9 trillion in 2020.
- Bangladesh ChipMakers:
 - Neural Semiconductor Limited office in Uttara.
 - PrimeSilicon Limited
 - Ulkasemi
 - Walton in Bangabandhu Hi-Tech Park
 - ACI is going to invest soon

Transistor

- semiconductor that amplifies or switches electronic signals.
- basic building blocks of modern electronics.
- **Applications:**
 - **Computers**
 - **Cell Phones**
 - **Automotive**
 - **Space and Military Applications**

Evolution of IC Technologies

- **1925: J. Lilienfeld proposed the basic principle of MOS FET (Field Effect Transistor).**
- **1935: O. Heil proposed a similar structure.**
- **1962: P.K. Weimer (RCA) first placed pMOS and nMOS transistors on the same substrate.**
- **1963: Frank Wanlass (Fairchild) invented inverter, NOR and NAND CMOS gates.**
- **1965: The first MOS calculator.**
- **1971: Emergence of nMOS-silicon gate technology.**

Textbook and readings

- **CMOS VLSI Design: A Circuits and Systems Perspective**
 - **Book by David Harris and Neil Weste**

THANK YOU
